“WITH MALACE TOWARDS NONE, CHARITY FOR ALL”

LINCOLN GOING STRONG

CO'S REPORT

BY REAR ADMIRAL

KEITH S. SHIKOWITZ

LINCOLN STARTING A NEW ERA

With the commissioning of our Prometheus Class starship in July, a new era for the USS Abraham Lincoln will begin. The shakedown we have been doing since August 2021 has been very successful. We have gained 8 new members since then. Members of the ship have been very active, participating in events around the state and region.

This new era is beginning with the Lincoln being well represented at activities all around the region.

Rear Admiral Shikowitz, Commander Shikowitz and Crewman Recruit Shikowitz have been traveling around NYS to various activities including two trips to Ticonderoga TOS Original Series Set Tour. In February, as already reported, Rear Admiral Shikowitz and Crewman Recruit Shikowitz met Robert O'Reilly and JG Hertzler there and to Collectorfest in NJ. In May along with Commander Shikowitz met George Takei and Walter Koenig. Coming up in July they along with Crewmen Scott, Fleishman, and Former XO, Commander Yee, will be attending Shore Leave in Maryland. In August with Commander Viohl, Ensign Orapello, Crewman Murray and Civilians Shikowitz and Murray, the three of them will be attending Trekonderoga.

On May 1, Rear Admiral Shikowitz, Commander Shikowitz, Crewman Recruit Shikowitz and Civilian Liaison Shikowitz attended Chiller Theatre Convention in Parsippany NJ. We got to meet many start from a variety of television shows and movies. The list included, Melissa Gilbert, Timothy Busfield, Christopher Lloyd, Loretta Swit, Jamie Farr, Mickey Dolenz, Diane Salinger, three cast members from the Saturday morning 1970's show Land of the Lost.

Other activities the Lincoln will be participating in include, attending the Challenger bbq, the Lincoln bbq in July. Some of the crew will be working at a charity car show on July 16.

I am glad the Lincoln has come out of the pandemic as strong and active as we are and am looking forward to continuing this trend.

FIRST CONTACT ACTUALLY HAPPENED 145 YEARS AGO

(It's just not official yet)

By: Rear Admiral Keith S. Shikowitz

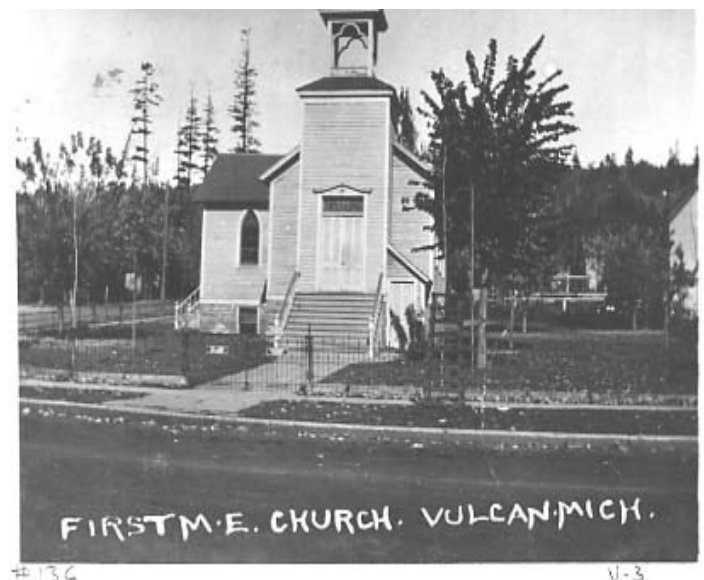

According to the Star Trek time line, we are still 41 years From First Contact with the Vulcans. Reality is a lot different From science Fiction. The 40 Eridani star system where Vulcan is located is a mere 16.5 light years From the Sol system.

The people of Vulcan landed on Earth in the late 19th century in an area of the Upper Peninsula of Michigan 10 miles east of Iron Mountain and established a city named after their planet in late July, 1877. They even established a post office in order to blend in with the humans on October 31, 1877. Today there are 1,923 Vulcans living there.

Vulcan was originally called Breitung or Breitung Mine for the mine around which it developed, officials of the Menominee Mining Company selected Vulcan as the name of the mine.

In order to insure they were not killed off by a disease that might hit one community, they also established a town in Southern Alberta Canada with a population of 4,237. In Alberta they are governed by the Vulcan County Council.

It seems they even bobbed their ears to look human and began assimilating by accepting human religious beliefs to hide their alien heritage.

UPCOMING

2022

JULY

9— USS CHALLENGER BBQ

15—17 SHORE LEAVE

LINCOLN LEVITY

Bob's Wife and Bob started dieting a week ago.

His wife proposed that they should have a cheat day today.

She brought home McDonald's burger, KFC wings and Bob brought home his Secretary.

From his hospital bed, Bob is wondering when men will ever begin to understand women.

Pros of being an adult: I can eat 28 cookies and no one can stop me.

Cons of being an adult: I ate 28 cookies. No one stopped me, and now I feel awful.
